Roberto Serra

Senior Software Engineer

I am a Software Engineer/DevOps with more than 15 years of experience, during which I have worked with a wide array of projects, teams, clients, and technologies.
I'm very passionate about technology, especially with AI, Machine Learning, and algorithms.

Work Experiences

Software/MLOps Engineer (*@WaterView*) *Apr 2024 - Present*

Developing, deploying, and maintaining computer vision AI-powered pipelines on IoT devices and distributed systems.
Tech: *Python, Docker, AWS GreenGrass, Ansible, Linux, Pandas, OpenCv*

Director of Technology (*@Etiqa*) *Apr 2023 - Apr 2024*

Leading 14 Developers and DevOps divided into small teams on multiple projects while providing technical assistance and mentorship.
Tech: *AWS CloudFormation, System Architecture, Lucid, Docker, TDD, Unit Testing*

Software Engineer (*@Etiqa*) *Sept 2014 - Present*

Designing and developing enterprise and large-scale modern web applications for the US and European markets.
Tech: *React, JavaScript, TypeScript, Python, Clojure, RabbitMQ, MongoDb, Jenkins, C#*

Web and Mobile Developer (*@Muvobit*) *Jan 2012 - Aug 2014*

Developing and designing web applications, mobile apps, and HTML5 games.
Tech: *Yii, PHP, MySQL, JavaScript, jQuery, HTML5 Canvas*

Web Developer (*@Real.co*) *Mar 2010 - Dec 2011*

Developing and maintaining a live auction web application.
Tech: *PHP, HTML, CSS, JavaScript*

Education

Università degli Studi di Torino
Laurea in Scienze Della Comunicazione - Bachelor of Arts in Communication Studies

Personal Info

Email: obi.serra@gmail.com
Born: 10/06/1983
Based on: Torino, Italy

Skills

- Python, TypeScript, C#, JavaScript, Clojure, C++, PHP
- FastApi, Pydantic, Asyncio, Pytorch, Pandas, Numpy, Scikit-learn, Matplotlib, Seaborn
- React, Redux, NodeJs, Express.js, Tailwind CSS
- Raspberry PI, Arduino, 3D printing, Edge computing, IoT
- AWS Lambda, S3, CloudFormation, Cognito, APIGateway, AWS SQS, Google Cloud Provider
- DynamoDb, MongoDb, MySQL, PostgreSQL
- Git, bash, ssh, MacOS, Linux, Jenkins, Docker, RabbitMQ
- Unit-Testing, TDD, E2E testing, Cypress, Jest

- Very strong communication skills
- Great experience as a team leader and department director
- Excellent problem-solving abilities, capable of finding practical solutions
- Great at adapting to different situations and project requirements
- Quick and eager learner, committed to continuous self-improvement

Languages

Italian - Native
English - Fluent

Roberto Serra

Senior Software Engineer

Notable Projects

Some notable projects I have worked on

Solution Architect and Team Lead for Multiply Labs, a San Francisco-based robot startup

Through my dual responsibilities as a Solution Architect and Team Leader, I coordinated the engineering team's efforts, driving them toward successfully delivering an ad-hoc solution on the cloud and on-premise hardware.
Tech: *Python, AWS Lambda, AWS CloudFormation, Docker, FastApi, React, TypeScript, Software architecture, TDD, Agile, PR-reviews*

Senior full-stack developer for the 2020 Tokyo Olympics official website

I contributed to developing the 2020 Tokyo Olympics official website, working on the front-end, back-end, and automation pipelines.
Tech: *C#, JavaScript, CSS, HTML, Scrum, Cypress*

Senior full-stack developer for a UnitedHealth Group service

I worked as a full-stack developer on an insurance quoting web application targeted to medium and small businesses for the UnitedHealth Group, a Fortune top 10 assurance company, refactoring an old Java monolith application into a micro-services-based one and creating an ad-hoc git flow to increase the maintainability and ease of deployment.
Tech: *Clojure, JavaScript, RabbitMQ, Jenkins, AngularJs, Git*

Interactive YouTube Masthead for a Armani Code advertisement

I created a YouTube Masthead with an interactive video optimized for mobile and desktop.
Tech: *JavaScript, CSS, HTML, Canvas*

Side Projects

Some side projects I am proud of

NodeJS Lab at Turin University

Tech: *Node, Git, JavaScript, TypeScript*
I taught a NodeJs laboratory at Turin University for two years. The lessons were aimed at students with basic programming experience and covered several NodeJs aspects, such as use cases, async programming, and unit tests.

A small scriptable keyboard created with a 3d Printer and an Arduino Micro Pro

Tech: *C++, Arduino, 3dPrinting*
Github Repository: https://github.com/obiSerra/shortcut_keyboard

A Khan's Soul - A JavaScript game created for the Js13kGames competition

Tech: *JavaScript, HTML5 Canvas, CSS*
Js13kGames entry: https://js13kgames.com/entries/a-khans-soul
